

Clark Forklift

Clark Forklift Forklift Training - Performing globally, there are now 350,000 Clark forklifts and lift trucks in operation, with more than 250,000 of those in service in North America. Clark has five major lines of lift trucks across the world, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, covers more than 120,000 particular parts fabricated for 20 distinctive brands of lift trucks and automated equipment. Your local Clark Dealer is your total source for availability of all your components requirements supplied by Clark Totalift.

Clark has a phenomenal Parts Distribution team. The items warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their buyers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Driven to offer the highest level of value and service to our clients, Clark remains on the leading edge when it comes to enhancing productivity and benefiting performance.

Clark Totalift has a very amazing worldwide support network. With over 550 locations globally, dealer representation in over 80 countries and 230 locations in North America, their high level of dedication to their customers predominates the materials handling market.

Clark proudly remains an progressive leader of the material handling industry, pioneering safety features such as the operator restraint system. This exceptional commitment to safety is at this time a standard feature on every forklift.

Clark has a uncompromising goal to possess the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be globally certified with quality standard ISO 9001 in all of its production facilities. Additionally, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental limitations, thus placing them in a prevailing industry position.

Lean Production

Clark has preferred the particularly economical and beneficial structure of "Lean Manufacturing" for its assembly facilities and application of resources. This system was developed to acknowledge the most successful method of manufacturing facility stewardship and ensuring maximum efficiency. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Engine Design

Clark's product engineers and suppliers join together to develop the efficiency and excellence of their products while minimizing costs. The new value engineering agenda combines innovative product improvement and offers superior customer support and service within the industry.
